Subject: Microsoft Settlement

I, Parx Shearer, believe that Microsoft's actions have been a disgrace to the computing industry and worthy of harsh retribution. Microsoft unashamedly sought to bring down competitors in any manner possible, legal or otherwise. Now Microsoft believes that it can not only get away with this behavior, but continue this behavior in the future. I find this unacceptable and send this comment to you in hopes that justice will be served against Microsoft so that all software vendors may have equal opportunity to offer their products for the betterment of the American society.

Thank you, Parx Shearer
